CHEAPEST MAG SUB AGENCY - SHIPS WORLDWIDE+FREE 1yrSUB

>>> THIS IS BEING
POSTED AS AN INFORMATION SERVICE TO INFORM PEOPLE OF THE AVAILABILITY OF
THIS INFORMATIONAL RESOURCE: MAGAZINE SUBSCRIPTIONS. I OBTAIN NO BENEFIT
FROM POSTING THIS MESSAGE OTHER THAN THE SATISFACTION OF HELPING OTHERS
SAVE MONEY AND DIRECTING THEM TO A USEFUL CLUB.

>>> My name is Annette Dove and I recently started using a magazine subscription club in the USA that has a FREE 1 yr. magazine subscription deal with your first paid order- and I have been very pleased with them. They guarantee to beat all their competitors' prices. Sometimes they are less than half of the next best deal I have been able to find and other times, just a little cheaper - but I have never found a lower rate yet. They assured me that if I ever do, they will beat it.

[illegible][illegible]

>>> The owner thinks
of his service as a "club" and his clients as "members" (even though
there is no extra fee to become a member - your first purchase
automatically makes you a member) and he is real picky about who he
accepts as a new member. When he sets you up as a new member, he himself
calls you personally on the phone to explain how he works his deal, or
sometimes he has one of his assistants call. He is kind of quirky
sometimes - he insists on setting up new members by phone so he can say hi
to everyone (I sure wouldn't want to have his phone bills!), but you can
place future orders (after your first order) via E-mail.

>>> He has some really friendly ng ladies working for him, who seem to know just as much as he does about this magazine stuff. If you live overseas, he will even call you there, as long as you are interested, but I think he still makes

A little credit ought to also be shared with the Scotsman who designed
the steam engine for Maxim's plane (didn't he call it the "Enormity"?).
That fellow's name was Roberts, and he later emmigrated to America, where
he designed an built 2-cycle boat motors--a derivation of which powered
many of the first "homebuilt" airplanes in North America.

Senator Barry Goldwater's K7UGA call, will be used for a special event
station on Saturday, September 17, 1994, in coordination with F.A.R.E.,
The Family Amateur Radio Event in Scottsdale, Arizona. This will be a
massive event with the Sheriff of Maricopa County speaking at 11:00am,
and even the department's helicopter landing and on display! The event
station will be operating, mostly on 20 meters, from 16:00utc to 21:00utc.
A QSL card will be sent automatically for all QSO's.

Heh! You may also have been suffering from Attention Deficit Syndrome.
All the amateur radio magazines have been mentioning the need to
use the new 610 form (initial month for its use was June, as I

remember it) several months in advance of that date.

If you had been a member of ARRL they sent the new form out unsolicited.

Help! I need the dipswitch settings for a PL of 131.8 for a Kenwood TH-31BT. I'm sure they would be the same as for a TH-41BT. TNX & 73 de Paul, W1ETH/6

It used to be that one General class licensee was all that was needed to administer a Novice exam. Then it was two. Now that its all rolled into the VE program, 3 examiners are needed at all testing sessions for all license classes.

: - Brian

Hi Brian, it is not a news or mail system problem. It in an info-hams problem. (Info-hams is a subscription service over email). Even if my email system attaches my correct address, it will be corrupted by the time it is mailed out on info-hams@ucsd.edu

The story used to pass around our radio club at Maryland about the ham
who was up on his tower doing work on the 432 antennas when somebody
down in the shack flipped on the 432 rig and 1 kW amp, and sent a CQ.

Maybe some other UMerS reading this will be able to verify the story.
The man went blind from the RF. Granted, 432 is considerably more
energetic than is 144 MHz, but it could still, conceivably, happen at
144.
